

## Web Developer: Internships

We are seeking enthusiastic web developers, ideally with some experience, to join our fast-growing team. We are accelerating our roll out of a range of internal and external web-based applications. These are critical in positioning our business over the next few years and therefore you will be working directly with the executive team. A can-do and results orientated attitude is therefore a must.

If a blank canvas and solving problems within a very agile environment gets you excited, please submit a short CV to [john@cia.co.za](mailto:john@cia.co.za). Ideal requirements are provided below.

### Experience and Skills

- 1+ web developer experience with C# and ASP .NET experience
- 1+ year of SQL server experience
- Aptitude with web development languages (HTML, Javascript, CSS, PHP, etc.)

### Advantage

- Experience with the Javascript React Library
- Experience with ASP .NET Identity and Razor Pages
- Cloud computing experience (Microsoft Azure, Firebase)
- Experience with Git/Github

### Education:

- Diploma in programming or higher
